- Use in refresher training (Drill nights)
Statutory Requirements

- Safety Statement.
- Hazard Identification & Risk Assessments In-house and on scene.
- Control of Contractors.
- Reporting & Investigating of Accidents.
- Emergency Evacuation Procedures.
Communications

• Fire Services and the Public. Perception and public image.
• Fire Service and Industry. Lack of knowledge.
• Fire Service & Local Authority Planning Department.
Consequences of Poor Safety

Liability of Directors, Managers, Officers of undertaking –

• Where an offence under any of the relevant statutory provisions has been committed by an undertaking and the doing of the acts that constituted the offence has been authorised, or consented to by, or is attributable to connivance or neglect on the part of, a person, being a director, manager or other similar officer of the undertaking, or a person who purports to act in any such capacity, that person as well as the undertaking shall be guilty of an offence and shall be liable to be proceeded against and punished as if he or she were guilty of the first-mentioned offence.
Consequences of Poor Safety

• Where a person is proceeded against for such an offence and it is proved that, at the material time, he or she was a director of the undertaking concerned, or a person employed by it whose duties included making decisions that, to a significant extent, could have affected the management of the undertaking, or a person who purported to act in any such capacity, it shall be presumed, until the contrary is proven, that the doing of the acts by the undertaking which constituted the commission by it of the offence concerned under any of the relevant statutory provisions was authorised, consented to or attributable to connivance or neglect on the part of that person.
Managers responsibilities

- Under the 2005 Act responsibility for safety and health is placed directly on those in charge in the workplace. In other words, Managers who control the work being done must take on this responsibility.

- Regardless of the size of the undertaking, it is important that Managers and officers are fully informed of the relevant safety and health matters and requirements that apply to them. They must understand their role in governing safety and health, which is part of their responsibilities for good corporate governance in running any business. This is applicable to all Managers including SO & SSO.
